MILE OF CARS – WE ARE ALL IN THIS TOGETHER

SAN DIEGO, Calif. -- (April 20, 2020) The Mile of Cars in National City is doing its part to ensure that the dedicated staff who are servicing our community are following all the safety and physical distancing requirements outlined by the County and State to help slow the spread of the COVID-19.

The dealers on The Mile have taken the initiative to remain open to handle all essential transportation needs; and keeping everyone safe is the top priority! Service departments have shortened hours, provided ample physical distancing in waiting areas, and may coordinate delivery and pick up service options upon request. Sales departments have moved to online inquiries and by appointment only in order to assist with any essential transportation needs at the same time as protecting staff and the community.

The health and safety of the employees, customers, and community are of the utmost importance to us. Therefore, each dealer is taking extreme cleaning measures throughout their facilities, staying in close contact with the City of National City, working with the National City Police Department and staying informed of any additional orders from the Governor's office and following all safety guidelines set forth.

"Our City is working closely with the businesses community to provide outreach and education based on County and State guidelines. The Police Department is working closely with our Code Enforcement Division to address concerns as they are reported by the public or observed during patrol. National City and the Mile of Cars have worked hand in hand since the Mile's inception and continue to keep an open line of communication. Together We Can get through this pandemic, because we are all #StrongerTogether!" Mayor Alejandra Sotelo-Solis.
